### PROFILE

I am a Front-End Developer focused on building high-performance web and mobile applications using React, Next.js, and React Native. My core expertise lies in crafting clean, type-safe interfaces with TypeScript, supported by a practical understanding of Back-end development (Node.js, Express, and Supabase). This background allows me to build front-end architectures that integrate efficiently with APIs and databases. I prioritize maintainable code and solving complex problems to deliver reliable, user-friendly solutions

### PROFESSIONAL EXPERIENCE

#### Front-End Developer

10/2025 – Present

*Vertex-Era*

- Created and built responsive, SEO-friendly web applications using Next.js, React, and TypeScript.
- Developed user-friendly interfaces optimized for performance and accessibility.
- Collaborated with the team on feature development, bug fixes, and UI improvements.

#### React and React Native developer

06/2025 – Present

*Wfrlee*

- Developed responsive web applications using React, and TypeScript.
- Developed mobile applications (iOS & Android) using React Native and TypeScript.
- Built user-friendly interfaces with focus on performance and usability.
- Collaborated with the team on feature development and bug fixes.
- Optimized applications for cross-platform performance and smooth user experience.

#### IT & Data Entry

12/2023 – 12/2024

*Military Service*

- Managed data entry tasks and maintained accurate records.
- Operated and managed the biometric attendance system for tracking personnel check-in and check-out.
- Provided IT support for hardware and software issues related to attendance systems.

### INTERNSHIPS

#### Information Technology Institute (ITI)

07/2025 – 11/2025 | Zagazig

Full-Stack Web Development Using MEARN

Intensive training program covering modern web development technologies and frameworks.

Worked on real-world projects using MongoDB, Express.js, Node.js, Nest, Angular, React, and Next.js to build complete web applications.

### EDUCATION

#### BS, in Computer Science

05/2018 – 05/2023 | cario

*Future academy*

Grade C+

- Database Management Application with C# [2nd Year project]
- Oracle Database for students [3rd Year Project]
- Full project on smart parking powered by C++, C#, React, React Native and embedded systems [4th Year Project] [Grade A+]

## PROJECTS

---

### E-commerce [↗](#)

A dynamic website built with React that offers smooth browsing, filtering, and a modern shopping experience

### Movies to watch [↗](#)

Web app you can rating the movies you watched and will save in your list

### World Wise [↗](#)

Track your journey of travel and adventures in all countries of the world

### Challenges [↗](#)

Some of challenges in front-end mentor built with react and css.module

## COURSES

---

### React The Complete Guide [↗](#)

### The Ultimate React Course [↗](#)

## SKILLS

---

**Fundamentals:** HTML, CSS, JavaScript, Typescript, Node.js, jQuery

**Styling:** Material-UI, Bootstrap, Tailwind CSS, Shadcn, SASS/SCSS

**Frameworks:** React.js, Next.js, Angular, NestJS, Express, GraphQL, ReactNative

**Databases:** MongoDB, Firebase, Prisma, PostgreSQL

**Tools:** Git, Command Line, Docker, GenAI

**Concepts:** Object-Oriented Programming, SOLID

## INTERPERSONAL SKILLS

---

- Strong communication skills
- Teamwork and collaboration
- Adaptability and flexibility
- Problem solving
- Time management and organization

## LANGUAGES

---

**Arabic:** Native

**English:** B1

## INTERESTS
